

Cosponsor the Preserving Patient Access to Long-Term Care Pharmacies Act (H.R. 5031)

The Preserving Patient Access to Long-Term Care Pharmacies Act (H.R. 5031), or the LTC Pharmacy Fix, is a simple and proven way to fill the reimbursement gap created by the move to Medicare negotiated drug prices.

- Modeled after an existing Medicare Part B supply fee, this bill creates a two-year, targeted \$30 supplemental supply fee for Part D Maximum Fair Price (MFP) drugs under the Inflation Reduction Act (IRA)— effective in 2026 and 2027.
- LTC pharmacies will face unsustainable revenue loss on brand-name medications subject to MFP prices and could be further impacted by market dynamics that lead to lower reimbursement rates.
- **The \$30 supply fee will fill the gap**, ensuring LTC pharmacies can remain operational and can provide patients in LTC with essential medications and high quality care.

LTC Pharmacies <u>WITHOUT</u> a \$30 Supply Fee	LTC Pharmacies <u>WITH</u> a \$30 Supply Fee
<ul style="list-style-type: none"> ✗ Unsustainable financial losses ✗ Closed LTC pharmacies ✗ Nursing homes out of compliance ✗ Seniors in LTC lose access to medications 	<ul style="list-style-type: none"> ✓ Adequately funded for essential services ✓ Remain in operation serving patients ✓ Nursing homes remain in compliance ✓ Seniors in LTC retain access to medications
